EDUCATION

***Master of Science in Business Analytics*,** Rady School of Management 08/2025 - 06/2026
University of California, San Diego, CA GPA: 3.84/4.0
Bachelor of Arts in Literature, Minor in Finance 09/2021 - 06/2025
Fudan University, Shanghai, China GPA:3.51/4.0

EXPERIENCE

Data Analyst (Capstone), Thermo Fisher Scientific San Diego, CA 02/2026 - Present

- Developed a supply chain risk early-flagging framework via Python-SQL based ETL workflows to identify key drivers of OTTP% misses, leveraging query-sourced order, inventory, ATP, and pharma backlog trends across SKUs
- Partnered with cross-functional business stakeholders to validate root-cause and ML indicators, translate insights into operational recommendations and deploy the solution in Databricks and PowerBI for sustainable decision support

Digital Marketing Intern, Checkit Analytics San Diego, CA 02/2026 - Present
An AI-driven fintech startup developing investment LLM agents integrate structured financial data with valuation modules

- Developed a cross-channel marketing machine learning framework by wrangling data using Python, identifying top-performing content on views, engagement, and subscriber conversion
- Built BI-style analyses to segment user behavior and identify high-performing content drivers
- Designed a social media content intelligence pipeline using Claude API to uncover high-performing messaging patterns and accelerate product experimentation (A/B test), improving content prototype usability by ~30%

***Data Scientist Intern*,** Fudan University AI^3 Institute Shanghai, China 04/2025 - 06/2025
Collaborated with Koubei, Alibaba Group's local services O2O platform, providing demand analytics for offline merchants

- Co-built a retail traffic forecasting system using O2O data (~1M records, 2,000 merchants), supporting inventory and staffing decisions and reducing an estimated 14% operational costs
- Cleaned and engineered production-ready time-series datasets in Python by performing EDA, joins, quality checks and feature engineering to ensure reliable downstream machine learning analytics
- Delivered merchant-facing dashboards in PowerBI by integrating demand signals with contextual factors (weather, local events), informing targeted operational strategies and identifying city-level customer lifecycle values

***Consultant Intern*,** S&P Global Shanghai, China 05/2024 - 11/2024
Mobility Group, specializing in consumer insights, analytics and brand strategy for East Asia's electric vehicles sector

- Conducted 10+ data-driven market and strategy studies on EV sector, covering OEM product strategies, platform roadmaps, net growth and demand outlook, delivering actionable insights via decks and Tableau dashboards
- Used SQL-based ad hoc analysis to maintain and report recurring competitive intelligence datasets, performing reconciliation to ensure data accuracy and consistency across reporting cycles
- Collected powertrain data (50K+ records) via Python by integrating APIs and web scaping, standardizing outputs into ESG metrics, and working cross-functionally with global teams to support a shared assessment database for research

***FP&A Intern*,** East West Bank Shanghai, China 11/2023 - 03/2024
A U.S.-based commercial bank with expertise in bridging financial services between the U.S. and China

- Maintained Asset-Liability Committee reports and Excel frameworks to track monthly accounting trends, providing directors with performance reports in PPT
- Tracked budget execution, cost ratios, and loan KPIs by unit using Excel formulas (VLOOKUP) and pivot tables, creating dynamic visualizations to help VPs interpret spending patterns

PROJECTS

Telecom Industry Customer Churn Analysis (Python, Tableau) github 12/2025

- Designed an end-to-end churn analytics workflow to translate churn probabilities into decision-ready metrics，quantifying risk distribution and revenue exposure across segments, suggesting ~$36K in potential retention upside

SKILLS

Computational Skills: SQL (MySQL, Google BigQuery), Python, Google Analytics, R, AWS, PySpark, Git, ETL, Jira
Data Intelligence & Reporting: Tableau, Power BI, Salesforce, PowerPoint, Excel (VBA-)
